

Donald Brinley, associate professor of philosophy at Saint Joseph's, addressed approximately 80 participants here June 6 during a six-day institute on "Designing a Core Curriculum." Dr. Ralph Cappuccilli of the SJC communications department termed the institute "the most significant academic event to take place during my 31 years of teaching at Saint Joseph's."

Saint Joseph's Appoints Faculty, Staff Members

Saint Joseph's College has announced the addition of eight persons to the faculty and staff, plus the appointment of a returning staff member to an administrative position.

New to the faculty and staff for 1979-80 are:

Dr. Elizabeth Acheson, assistant professor of education. She had been assistant professor in the School of Education at Rider College (Lawrenceville, N.J.) since 1975. Dr. Acheson has previously served as a fine arts library assistant, elementary school teacher and teaching fellow.

James Beaghan, assistant professor of business administration. Beaghan had taught business administration and management at Simpson College in Indianola, Iowa, since September of 1978 with the rank of assistant professor.

Allen Berger, assistant professor of sociology. He received a bachelor of arts degree from the University of Chicago in 1972, a master of arts degree in anthropology from Columbia University in 1974 and a master of philosophy degree in anthropology from Columbia in 1976.

David Byrd, assistant director of student residence life. A native of Rensselaer, Byrd received a bachelor of science degree in criminology in 1974 with a minor in sociology from Indiana State University. He has served in both the U.S. Marine Corps and U.S. Army, was personnel manager at Schumacher Electric Corporation in Rensselaer during 1974-76, and was employed by the Indiana State Employment Security Division since last April.

Sister Mary Dennis Donovan, admissions counselor. She has received bachelor's and master's degrees in education from Duquesne University (Pittsburgh, Pa.), and has been involved in a broad range of religious, educational and public affairs services.

Sister Catherine Fay, a member of the college community since 1977, but now newly appointed as director of guidance. She has previously taught elementary, junior high, senior high and college at various sites in Iowa and Indiana. She came to Saint Joseph's in 1977 to assist in academic guidance and counseling.

Mara Pindell, admissions counselor. A native of Indianapolis, Miss Pindell received a bachelor of science degree in communications and theatre arts from Saint Joseph's in June of 1978. She has previously worked for

the Indiana Department of Public Welfare and the Indianapolis Department of Parks and Recreation.

Miss Pindell will work in student recruitment in north central Indiana and northwest Ohio. She will visit with prospective students and their parents while also attending "college nights" for high school students.

Brother Ric Presar, instructor in art. He will be in charge of the college art department, will teach in the Core general education curriculum, and assist as a student counselor. He attended Kent State during 1973-74, taught art at St. Adalbert's School in Cleveland, Ohio, during 1974-75, then entered the Society of the Precious Blood in 1975 and worked at the Fort Wayne (Ind.) Precious Blood Parish during 1975-76.

Rich Wheeler, assistant football coach. A 1972 alumnus of Saint Joseph's, he served as offensive line coach at Hamline University in St. Paul, Minn., where the 1978 football team compiled a 5-4-1 record.

He received a bachelor of arts degree in English from Saint Joseph's in June of 1972, and is a member of the college Fellows Program.

Summer Repairs Completed

There was no shortage of activity on Saint Joseph's campus this summer as workmen moved through repairs and improvements bearing a common thread of efficient use of energy, especially heat.

"Efficient use of energy is definitely our goal," explains Kenneth Zawodny, vice-president for business affairs. "When you talk about something like efficient use of heat, this not only means comfort in the colder months, but it means dollar savings that are very important."

In addition, Zawodny emphasizes the importance of preventive maintenance. "We try to structure our program of repairs so as to head off problems before they become a crisis. You can never save by letting problems pile up; they only become more expensive."

Heading this summer's improvements were the installation of new room furniture in Noll Hall, plus

the caulking and tuckpointing of both Halleck Center and Schwieterman Hall.

Improvements were made to the baseboard heating systems in Noll Hall and Bennett Hall, while Gallagher Hall received a new heat exchanger and expansion tank.

Better heating should also result in the fieldhouse, where the heaters are being rebuilt and a steam regulator is being added, and in the carpenter shop, where new siding and insulation is being installed.

Aquinas Hall and Dwenger Hall received roof repairs, plus new gutters and downspouts, while Aquinas also is the site of new hallway carpeting. Halleck Center's entrance doors were improved, roof repairs were made to Justin and Schwieterman halls, stairtreads were replaced in the Science Building, and stair-tread replacement, begun last summer, was completed in Gallagher and Halas halls.

Rensselaer, Indiana, Thursday, August 30, 1979

No. 1

College Joins September Energy Month Declaration

Did you know that coal is Indiana's most abundant energy resource and that it accounts for about 42 percent of the state's total energy consumption? Or that petroleum is Indiana's second largest primary source of energy, representing about 33 percent of the state's energy consumption?

Facts like these, plus an extensive variety of tips and guidelines for more economical use of energy, will be brought to the attention of Saint Joseph's College students and em-

ployees in September as part of a two-step program wherein the college will participate in Energy Month as declared by Governor Otis Bowen.

"Step one in our program is to educate our students and employees in ways to save energy on a day-by-day and even a minute-by-minute basis," explains Kenneth Zawodny, vice-president for business affairs. "Step two will be to encourage our campus personnel to put this knowledge to use whenever possible."

Indiana's first Energy Month was proclaimed in September, 1978, and Zawodny agrees with Governor Bowen that "this is a time for each of us to consider the various forms of energy we use and take action to reduce consumption to offset the impact of rising fuel costs."

With the assistance of the Indiana Department of Commerce, Saint Joseph's will be supplied with literature on a wide-ranging list of energy-saving facts and ideas.

For example, an energy fact sheet provides extensive data on coal, petroleum, natural gas, liquefied petroleum gases, coal conversion, nuclear power, solar energy and hydroelectric power.

Fighting energy's "hidden costs" is the theme of a booklet titled "Energy and You" — a publication distributed by the U.S. Department of Energy. Other booklets to be distributed include: 30 tips for the motorist who wants to make his gas go further, how to improve efficiency of an oil-fired furnace, and a questionnaire to complete that the Indiana Department of Commerce will check and return to you in the form of a free energy analysis of your home.

Lastly, the commerce department packet includes a challenging energy quiz to test the reader's knowledge of energy, its uses and ways to conserve it.

Saint Joseph's College conferred 11 master's degrees on students during its annual commencement exercises July 28, concluding the annual Rensselaer Program of Church Music and Liturgy. Dignitaries at the commencement were, front row, left to right: Dr. John Nichols, chairman of the Graduate Council; Father Lawrence Heiman, director of the Rensselaer Program of Church Music and Liturgy; Most Reverend Rembert Weakland, Archbishop of Milwaukee and recipient of an honorary degree; Most Reverend Raymond Gallagher, Bishop of Lafayette in Indiana; Father Charles Banet, president of Saint Joseph's; and Frank Gallucci, chairman of the college Board of Trustees. Degree recipients were, second row, left to right: Sister Barbara Ann Smelko, Tucson, Ariz.; Sister Narcisa Fernandez, Davao City, Philippines; Brother Brian Johnson, St. Meinrad, Ind.; Sister Martha Ann Bupka, Canonsburg, Pa.; and Sister Amy Junk, Auburn, Ind. Third row, left to right: Sister Patricia Ann Toscano, Yankton, S.D.; Sister Dorothy Anita Smith, Blauvelt, N.Y.; Sister Janet Gorman, Spokane, Wash.; Sister Nancy Burkin, Rochester, N.Y.; Sister Donna Marie McGargill, Detroit, Mich.; and Sister Marilyn Schauble, Erie, Pa.

Save Energy, Money

Saint Joseph's campus was a proverbial beehive of activity this summer, as activities ranging from band camps and basketball camps to a stirring Core institute (early June) and a faculty workshop (mid-August) prevented cobwebs from growing anywhere on campus.

Most noticeable to returning students, however, should be an extensive list of summer repairs and improvements undertaken by college workmen. New room furniture in Noll Hall, improvements in the heating systems in Bennett, Gallagher and Noll, plus roof repairs to Aquinas and Dwenger are only a few of the summer's completed projects.

A common thread runs through many of the repairs: efficient use of energy, especially heat. As Kenneth Zawodny, vice-president for business affairs, explains, "Efficient use of heat means not only comfort in the colder months, but dollar savings in the short run and the long run."

All we students should pitch in and help in the conservation of energy this school year. September has been proclaimed Energy Month in Indiana and college officials will be distributing information to us in the next few weeks that will tell us how we can help.

By uniting in this effort to conserve energy, and by respecting and taking care of the college property in our dormitories and on our campus, we can help this college make ends meet in these difficult times of inflation. And who knows? This might enable college officials to keep our tuition costs to a minimum — and that should talk turkey to you, as well as mom and dad.

Johnson Outlines Best Job Openings

College students of today who are looking for business fields likely to offer challenging and rewarding job opportunities in the 1980's might be wise to carefully examine the areas of computer science, accounting and finance.

That's a major bit of advice offered by Harry Johnson, assistant professor of business administration at Saint Joseph's College.

"Marketing and management will always be there, but you don't need to specialize here any more," he begins. "Marketing and management are good areas to minor in, with the major field of study being accounting, computer or finance. It is evident that we are moving toward a computerized business world."

Johnson says there are many diversified business openings for the contemporary college graduate; it all depends on where the graduate wants to send himself. Do you want to work for a small or large firm? Do you want a job with a lot of or very little travel?

"You've got to know the job you're interested in and what it demands of you; don't jump into a job blind," he advises. "Do you want to work for the job or the money? The answer here may depend on your personal goals, or on your marital status. And there are other considerations — you may not like your job that well, but you may like the people you work with."

Johnson also stresses the importance of personality — it's a quality that may help the young graduate move from job to job with relative ease as he searches for his "dream"

job. "It helps if you can develop a knack for knowing when to talk and what to say, or knowing when not to talk. Friendships and contacts are extremely important, and you must show an interest in other people," Johnson advises.

Regarding extracurricular involvements for the undergraduate student, Johnson says these activities help a student's employment potential, but he warns that over-involvement in extracurriculars can cause more harm than help.

"In today's job market, you are competing with many people, including yourself, and you should ask many questions to learn information you need to know about your intended career," Johnson points out. "By developing contacts and asking the right questions, chances improve that you can carefully choose a good first job; and this is critical, because that first job may go a long way toward determining the eventual shape of your career."

Johnson recommends that undergraduates should not go straight to graduate school upon receiving their bachelor's degree. He suggests that the student should gather some professional experience first, and cites statistics that indicate most master's degrees in business administration are received between the ages of 27 and 30.

Various questions inevitably confront the student after graduation. Is the graduate program most important to me? Or what about a new car or a fancy apartment? Individual tastes and goals usually determine the answers.

Challenging Job

Wheeler Returns As Gridiron Aide

It's hard to beat the feeling of coming home, and Saint Joseph's new assistant football coach, Rich Wheeler, will readily second that notion.

A 1972 graduate of Saint Joseph's, Wheeler has returned to his alma mater to direct the Pumas' football defense, a craft that he helped raise to a fine art here as a defensive end in the late sixties and early seventies.

Wheeler makes it clear that he likes a challenge, and the challenge is certainly there as he seeks to elevate the Puma defense to those peak years of 1970 and 1971, when Wheeler and his teammates sparked the Pumas to their best two records of the past decade: 7-2-0 in 1970 and 8-2-0 in 1971.

"I was looking for a full-time coaching job at the Division II level of college ball, and this job happened to come along at just the right time and place," he explains. "I'm very happy and excited to be back at Saint Joe, and my family also is happy to come home."

"Not only is this job at Saint Joe a big challenge, but it is a step in the right

direction toward my eventual goal of becoming a head coach at the college level," he explains.

As for the Pumas' defensive outlook, he says "a lot of veteran players have graduated, and I'd say the defensive picture is wide open. We'll be a very young team and there should be a lot of strong pre-season competition for starting jobs."

He feels that his work as offensive line coach at Hamline University in St. Paul, Minn., during the past two seasons should be an advantage to him. "This has helped me to learn what an offensive line can do, and on defense we try to neutralize what the offense

can do," he explains. "This should give me a valuable insight in working with the defense."

Wheeler's first task upon coming to Saint Joseph's was to study the system of defense employed by the Pumas, so that he might teach it to the players. Part of what he calls a "crash" learning program also included study of films from last year's Ferris State and Indiana Central games.

As a student here, he won four football monograms, was named to the all-Indiana Collegiate Conference football team twice, was named the ICC's most valuable defensive lineman in 1972 and homecoming game MVP in 1970.

Flyshooter A Big Blast

Looking for just the gadget to shoot flies or other pests that wander into your room? Bookstore manager Shannon Dehn is shown here with the answer to your needs — the flyshooter. He'll be glad to demonstrate its uses when you visit the store.

How many times in your life have you wanted to swat a pesky fly, but lacked only the desire and/or ambition to fetch the fly swatter, then pursue the winged beast about the home or office?

Saint Joseph's College students can now make fly swatting into a game, demanding a bit of skill but much less energy than the use of a fly swatter calls for.

Campus bookstore manager Shannon Dehn has introduced the "flyshooter" on store shelves — it is a small plastic gun that shoots a dart accurately up to two feet at the target. The white plastic dart is fronted with a piece of

circular plastic mesh and attached to the gun handle by a piece of string.

"You can sit in your chair and make a real game out of getting rid of flies, mosquitoes and other bothersome insects," Dehn explains. "Admittedly the flyshooter is an inexpensive novelty item, but it should prove to be quite popular among the college set. The flyshooter is so new that even its patent is still pending."

Dehn noticed the flyshooter this past summer at the annual Chicago Gift Show and promptly ordered six dozen of them.

"Apricots" is the title of this woodblock print, one of 23 artistic delights that will be on display in Saint Joseph's science building during Sept. 13 to Oct. 14. These Chinese graphics from the Mustard Seed Garden Manual of Painting are part of the Indianapolis Museum of Art's State Traveling Exhibition Program.

Pumas! Successful Seasons Anticipated

There's a little bit of everything on tap for Saint Joe athletic fans this fall, as five varsity sports will keep players, coaches and fans on the go.

Cross country, football, golf, women's tennis and volleyball spice the menu that promises Puma fans can die of almost anything except boredom.

Saint Joseph's ranks as a logical favorite to capture the 1979 Heartland Collegiate Conference football title, courtesy of 18 returning lettermen plus the arrival of

one of the most impressive freshman crops in SJC history. Included among 70 newcomers to the football team are 11 all-state athletes, 13 all-city picks, 15 all-conference selections and six all-area choices.

SJC's running attack had a few ineffective games last fall, but the return of tailbacks Larry Shelton and Troy Williams indicates there will be a definite ground threat to prevent foes from overloading against the passing attack.

Toughest of the offensive tasks will be rebuilding an in-

terior line where the graduation of veterans leaves center Jim Murphy and tackle Scott Siedelmann as the only returning lettermen.

Ten returning lettermen give the defense a solid nucleus, starting with the rush line. Ends Joe Bezilla (38 solo tackles, 30 assists, one interception) and Matt Witry (three solos, one assist) should make life miserable for opposing quarterbacks, while tackles Brian Wynkoop (five solos, six assists) and Jeff Simon (11 solos, eight assists) are standout defenders against the run.

Newcomers rate an excellent chance to see action at linebacker, though letterman returnee Thomas Henry (13 solos, 14 assists) is a solid bet to start. Graduation also has opened up two starting jobs in the secondary, where veteran cornerback Mike Bettinger (56 solos, 33 assists, one interception) and Brian Brennan (25 solos, 11 assists, one interception) return.

Cross country could well be headed toward its most successful season in recent years with the return of veterans like Tony Martin and the arrival of newcomers like Steve Stanek to boost the Pumas' stock. Coach Dave Smith minces no words when he says "we should definitely be improved over the 1978 team."

At this writing, the golf picture remains unsettled un-

til freshmen can be blended into the program. Several lettermen return from the 1978 squad, and they have improved due to continued practice this past summer. But the Pumas must rely on newcomers to provide overall team depth.

Women's sports are coming on strong, and Father Ambrose Ruschau's tennis team is one of these. Last year's team was the most competitive here since the sport was

launched four years ago, and returning letter winners plus newcomers indicate more success lies ahead.

Enthusiasm is the word for volleyball, where coach Linda Taulman can't wait for the season to begin. Last year's team posted a 26-12 record and rolled into the state finals with a string of upset victories. This year, Taulman regards the Pumas as a legitimate state title contender.

Saint Joseph's football offense should be a king-size problem for the Pumas' 1979 foes, thanks to the aerial artistry of quarterback Mike Houston (16), who set an all-time SJC record for pass completion percentage last year as a freshman field general. Solid pass protection from blockers like Steve Gedney (75) is a key to the Puma offense.

Baseballers Finish 14-11, Spring Teams Fare Well

Winning usually spells good news in sports, and Saint Joseph's baseball team brought smiles to its fans last May by smashing Indiana University (16-6) and sweeping a doubleheader from Chicago State on the season's final day to complete a 14-11 season.

Not only did this performance secure the Pumas' sixth winning season in the last seven (the other was a break-even year), but it stamped a mark of success on coach George Waggoner's first campaign at the SJC helm.

In other spring sports, the men's and women's track teams broke a cumulative total of 33 Saint Joe school records and the men's tennis team showed continuing improvement.

It would be hard to top the kind of baseball season enjoyed by shortstop Kevin Sims. Now an alumnus, he batted .449, was the Pumas' most valuable player, co-MVP in the Heartland Collegiate Conference, a first-team all-HCC choice and an all-NCAA District IV selection.

He was joined on the all-HCC first team by rightfielder Nick Fries (.333 hitter) and pitcher George Ushela (5-3, 2.21 ERA). Third baseman Bob Ellis (.294, five home

runs) won second-team honors and catcher Don Steinhilber (.348) was a third-team choice plus the winner of Academic All-American laurels.

The 1980 baseball squad should have solid leadership behind co-captains Steinhilber and Ushela, batterymates who have been working together since their high school days at South Bend (Ind.) John Adams High School.

The men's track team finished 3-28-1 against stiff competition, but improved throughout the season. Six relay records, one medley record and 12 individual marks were established during the season, including five by Tony Martin and three by Louis Norris. The men earned 11 monograms.

In women's track, 14 records fell during a 7-20-0 season. Sue Dineen set three individual records in dash events, and overall team depth was evident in that four different foursomes established SJC relay records.

Despite a 1-5 dual match record, the men's tennis team showed steady improvement and the squad was the most competitive one in recent years. Veterans like Mike Casey, Bill Regan and Chris Spears all will be back next spring, and hopes for a winning season are not ill-founded.

PUMA PRINTS

Two Conferences Clarified

No one likes to exist in a state of confusion, and that makes this time at the start of a new athletic year an appropriate occasion to clear up some of the muddy water that arose now and then among Puma athletic fans during 1978-79.

Confusion was created because the Pumas are members of two different athletic conferences, and "the conference" often referred to during football season isn't the same one when basketball moves to the forefront.

Sound confusing? It was last year in the first athletic season following the demise of the old Indiana Collegiate Conference, but as tradition sets in and rivalries build in the new conferences, fans should have little trouble distinguishing between the two.

In the spring of 1978, the Heartland Collegiate Conference was formed as the successor to the Indiana Collegiate Conference. Former ICC members Butler University, University of Evansville, Indiana Central University, Saint Joseph's and Valparaiso University joined with Ashland (Ohio) College, Franklin (Ind.) College and Georgetown (Ky.) College to form this conference.

Football is the major HCC sport, but this conference also includes baseball, cross country, golf, swimming, tennis, track and wrestling. The philosophies of the HCC member schools regarding basketball vary widely, however, so basketball was not included as an HCC sport and each school was free to search for a new hardwood conference to join.

This search resulted in the Great Lakes Valley Conference, which was formed in the fall of 1978. It is essentially a basketball conference that includes five other sports. Members are Ashland College, Bellarmine College (Louisville, Ky.), Indiana Central University, Indiana State University of Evansville, Kentucky Wesleyan College (Owensboro, Ky.) and Saint Joseph's.

GLVC sports include basketball, baseball, cross country, golf, tennis and track; football is not included in this league.

A side-by-side comparison of the two conferences might best enable fans to recognize the similarities and differences:

Heartland Collegiate Conference

Ashland College
Butler University
University of Evansville
Franklin College
Georgetown College

Tennis
Track

Alert, aggressive baserunning sparked the baseball Pumas to a 14-11 record last spring. Typical of this was Kirk Adams' slide under the attempted tag of the Purdue North Central catcher during a 12-1, 6-5 doubleheader sweep of the visitors. The Pumas' Jack Emerson watches the action at left.

Freshmen Display Many Talents

They come from hometowns across the United States and even a few foreign countries, bringing with them a wealth of talent, experience of all sorts, and travels that would leave even Henry Kissinger feeling that he's seen a lot of places.

"They" are the freshmen enrolling this year at Saint Joseph's College, starting the first leg of a journey that will take most of them toward a graduation date in the spring of 1983.

Getting an education and mastering the challenges of the classroom will occupy these students for most of the next four years, and there is every reason to believe that this group of first-year students can successfully tackle the curriculum.

Several of the freshmen were valedictorians or salutatorians of their high school classes while many others earned scholarships or other academic awards from various sources. Many were members or officers of the National Honor Society in high school.

Public service is a common theme running through many of the jobs held by the fresh-

men. Many were summer camp counselors, one worked with the Youth Conservation Corps, another worked with autistic children through a local Christian Service Club and still another worked at a rehabilitation hospital.

Many of the more traditional types of summer employment are represented among the freshmen — carhops, clerks, construction workers, ushers, for example — but one was a model for Wiebolt's Youth Board and Montgomery Ward's Teen Board and another was a clown in a ministry retreat program.

One coed was a shampoo girl in a beauty parlor, while another was the manager of a boy's swim team. Mechanics is the strong suit of the freshman who operated an auto service garage for two years, and another first-year student operated a planetarium and received two awards for so doing.

One of the freshmen has been an athletic trainer for his high school basketball and baseball teams, and another fondly recalls his experience this past summer when he worked at the 1979 West-

ern Open golf tournament at the Butler National Golf Club in Oak Brook, Ill.

As for travel, the freshmen have visited most of the states of the union and many points beyond. One student has traveled throughout Europe, Africa, the West Indies, France, the Bahamas and Germany while another lived in Iran for five years.

A seven-day Caribbean cruise was the vacation highlight for one freshman, while another camped and canoed for ten days at remote Quetico, Canada. Another traveled to Spain with a group of Spanish-class students while in his third year of high school and one first-year student traveled to Finland in 1975 as captain of his high school hockey team.

Vacations are favorite recollections for many of the freshmen, and one best recalls a sailing trip in uninhabited islands off Florida's west coast.

Athletes galore are included among the freshmen, ranging from high school monogram winners to students who specialized in lesser-known sports. Many of these athletes won individual or team honors, including the softball player from Highland, Ind., who played on a state championship squad.

Hobbies vary widely among the class; one of the more uncommon pastimes belongs to the freshman who has won about 100 trophies, ribbons and medals as a marathon canoe racer in Illinois, Wisconsin, Iowa, Indiana, Ohio and New York.

The prize for togetherness goes to the freshman who says "fifty members of our family chartered a flight to California for a family vacation."

Dr. Andrew Mehall, chairman of Saint Joseph's department of biology, observes the emission lines from a mercury vapor lamp through a spectroscope purchased this summer by the college with funds included in the \$156,400 grant from Comprehensive Assistance to Undergraduate Science Education (CAUSE). Core science students will examine a variety of gases with the spectroscope. "The CAUSE grant does a great deal to improve facilities for our Core science program," Dr. Mehall explains.

Social Preview

Friday, Aug. 31, Halas welcome-back party, chapel cafeteria, 9 p.m. Movie: *The Adventures of Sherlock Holmes' Smarter Brother*, 7:30 and 10 p.m., auditorium.

Sunday, Sept. 2, movie: *The Adventures of Sherlock Holmes' Smarter Brother*, 7:30 and 10 p.m., auditorium.

Monday, Sept. 3, muscular dystrophy softball marathon, 10 a.m., outside Gallagher Hall.

Thursday, Sept. 6, Student Association picnic, 3:30 p.m., Lake Banet. Lumberjack competition, 4 p.m., Lake Banet. SA reception, 8 p.m., Lake Banet. Senior-faculty welcome-back party, 8 p.m., Lake Banet.

Friday, Sept. 7, junior class party, Lake Banet, 4 p.m. Movie: *A Wedding*, 7:30 and 10 p.m., auditorium.

Saturday, Sept. 8, mixer, 9 p.m., Halleck Center ballroom.

Sunday, Sept. 9, movie: *A Wedding*, 7:30 and 10 p.m., auditorium.

Saturday, Sept. 15, canoe trip on Wabash River near Lafayette, Ind., 9 a.m.

Sunday, Sept. 16, camp out, northwest Jasper County.

Sunday, Sept. 23, faculty-student golf outing, Curtis Creek Country Club, 10 a.m.

Freshmen flooded the campus last Thursday as the annual arrival of first-year students began. Here a freshman from Attica, Ind., prepares to move into Gallagher Hall.

Buckley Ruling Explains Privacy Rights

Information Concerning Student Rights Under Paragraph 99.6 of the General Education Provisions Act, Title IV of Pub. L. 90-247

- Students have the right to inspect and review their education records. Procedures for this inspection are given in statements that follow.
- Education records are kept in the following locations. The officer to contact in each case is listed.
 - Grades, graduation information, probation notices and the like: Registrar Saint Joseph's College
 - These records are also shared by: Vice President for Academic Affairs Saint Joseph's College
 - Financial aid applications, information on grants or other aid: Director of Financial Aids Saint Joseph's College
 - Ability tests, scholastic performance records used for counselling and guidance purposes: Director of Guidance Saint Joseph's College
 - Placement files and references: Director of Placement Saint Joseph's College
 - Records of a disciplinary or student resident nature: Dean of Student Services Saint Joseph's College
- Any request by a student to challenge the content or accuracy of any education records is to be directed in writing to the appropriate officer. In the cases of a. and b. above, the officer will arrange to have the challenge heard by the Academic Cabinet. In the case of c., d. and e. above, the hearing body will be the Student Life Committee.
- Procedures in the various offices:
 - Office of the Registrar
 - Inspection and Review of Education Records
 - The student may inspect all records in the Registrar's Office pertaining to himself, or herself. The following procedures will be followed:

- The student may inspect the record only in the presence of those having custody of the records.
- No records may be moved, reproduced, or changed without permission of the custodian of the records.
- If a student wishes to challenge the content of the records or their accuracy, he or she may request a hearing before the Academic Cabinet or a sub-committee authorized by the Cabinet for this purpose.
- The folder in the files are available for inspection by the Guidance Office without student permission. Other members of the staff and faculty who have a legitimate reason for inspecting the folders must make the request in writing, stating their reason for the request. This written request will be kept in the student's folder.
- Release of Records
 - Student records in the Registrar's Office are under the joint custody of the Vice President for Academic Affairs and the Registrar. The records, therefore, are available to them and to their staffs without student permission.
 - Copies of student grades and test scores may be released to the Guidance Office, to the Financial Aid Office for purpose of establishing eligibility for financial aid, and to those faculty members who have a legitimate reason for the information, and to parents of dependent students.
 - Student records may not be released to any person or agency outside of the College without the student's written permission, with the following exceptions:
 - The student may in a given case waive his right to restrict release of his record to written permission, and thus release it orally.
 - Records may be released without the student's permission by court order, under subpoena, or under conditions set forth in HEW regulation 99.35 to authorized representatives.

- Records already available from public sources may be released without prior permission.
- To officials of another school or school system in which the student seeks or intends to enroll, subject to the requirements set forth in HEW regulation 99.34.
- Safeguarding the student's right to refuse to permit the designation of any of the following items as directory information: name, address, telephone number, major, class, dates of attendance, honors (includes Dean's List), degrees conferred (including dates).
- Amendment of Education Record
 - No grades, once submitted to the Registrar's Office, can be changed apart from removal of I grades, except by written petition of the teacher to the Vice President for Academic Affairs. The student will initiate the process by petitioning the teacher for a change of grade.
- Office of the Vice President for Academic Affairs
 - The academic records and appeals of students subject to dismissal are available to the Academic Cabinet, which rules on probation and dismissal.
 - The academic records and appeals of dismissed or withdrawn students who apply for readmission are available to the Academic Cabinet, which rules on such readmissions.
 - The academic records of students who petition the Academic Cabinet for special permission are available to the Academic Cabinet.
 - The Vice President for Academic Affairs will release information about current and former students only (a) with the student's written permission, or (b) under court order or subpoena.
 - All other use by the Vice President for Academic Affairs of student records will be as provided in the Registrar's policy.

- Financial Aid Office
 - Dependent students may not inspect or request copies of the Parents Confidential Statement without the consent of the parent or guardian who provided the Statement.
 - Independent or self-supporting students have the right to inspect their own financial aid records. The following procedures will be followed:
 - The student may inspect the record only in the presence of those having custody of the records.
 - No records may be removed, reproduced, or changed without permission of the custodian of the records.
 - If a student wishes to challenge the content of the records or their accuracy, he or she may request a hearing before the Academic Cabinet or a sub-committee authorized by the Cabinet for this purpose.
 - In all other respects financial aid information is confidential and is available only to the Director of Student Financial Aid and his staff. It may not be released from the office or used in any personally identifiable way except for purposes of financial aid without the written consent, explicit or implied, of the parents or guardians in the case of dependent students, or without their consent in the case of independent or self-supporting students.
- Office of Guidance
 - Release of Information
 - The files that are related to students' academic situations (admissions forms, SAT scores, grades, predictive indices, etc.) are available (except personality tests) to any faculty member or administrator who has a legitimate interest in the student's academic progress; the student is notified when this information is being utilized by a faculty member.
 - Information in the student's file will be provided to individuals (other

- than faculty members or administrators) and agencies only with the written permission of the student involved or a court order.
- Right of Inspection
 - Every student has a right to see his or her record with the Guidance Counselor present and available to interpret test results.
- Office of Placement

The student prepares the file maintained in the Placement Office. The only documents prepared by someone else are educational and character references.

 - Right of Inspection
 - Student files may not be released to any person or agency without the student's written permission, with the following exceptions:
 - The student may in a given case waive the right to restrict release of his or her file to written permission, and thus release it orally.
 - The student may in writing generally release the file to any prospective employer interested in his or her employment.
 - Record is maintained of each authorized release of information.
 - Release of Information
 - The student may inspect his or her file at any time with a member of the Placement staff present.
 - The student file is under the custody of the Placement Office, and therefore is available to the Placement staff.
- Office of the Dean of Student Services

Information will not be disclosed from a student's file without the student's prior consent except to those authorized by Section 99.31 of the Act. When information is disclosed, a record of the information and to whom it is disclosed will be made in the student's file. Students or the parent(s) of dependent students shall be permitted to inspect and review their records and have the right to explanations and interpretations. Students also have the right to request that their files be amended through judicial process.
